

iHAC activity in Healthcare Bornholm

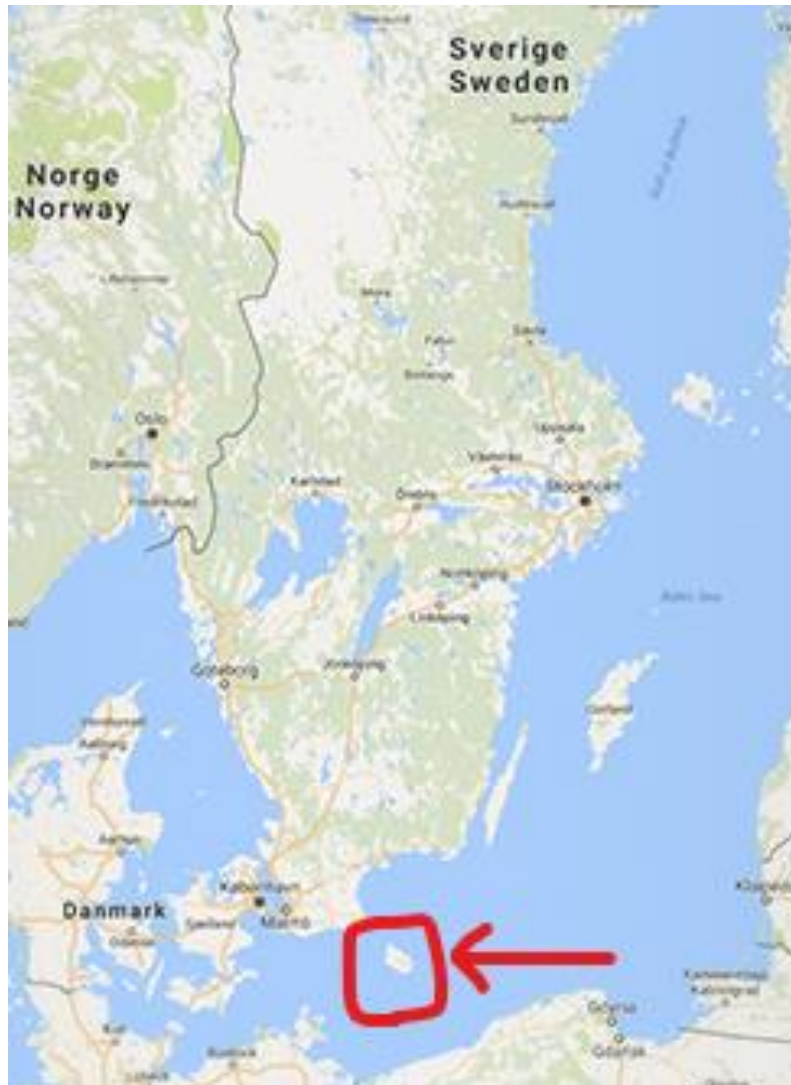

Cross-sectoral Strategy for Personcenteret Nursing Care

iHAC presentation, Storuman, november 2024

BORNHOLMS
REGIONSKOMMUNE

Bornholm

Bornholms Regionskommune and Bornholms Hospital Numbers (2023)

- 39.337 Citizens (decreasing)
- 12.139 Citizens ≥ 65 years of age (increasing)
- 32.005 contacts and 2.712 citizens with connections to municipal services (ex. nursing homes)
- 490 somatic readmissions
- 815 preventable hospital stays (SDS – SundhedsDataStyrelsen)
- 7400 admissions
- 46.700 outpatient visits
- 220 helicopter flights
- 112 acute ambulance transports (off the island)
- 40.700 single overseas patient transports

Challenges

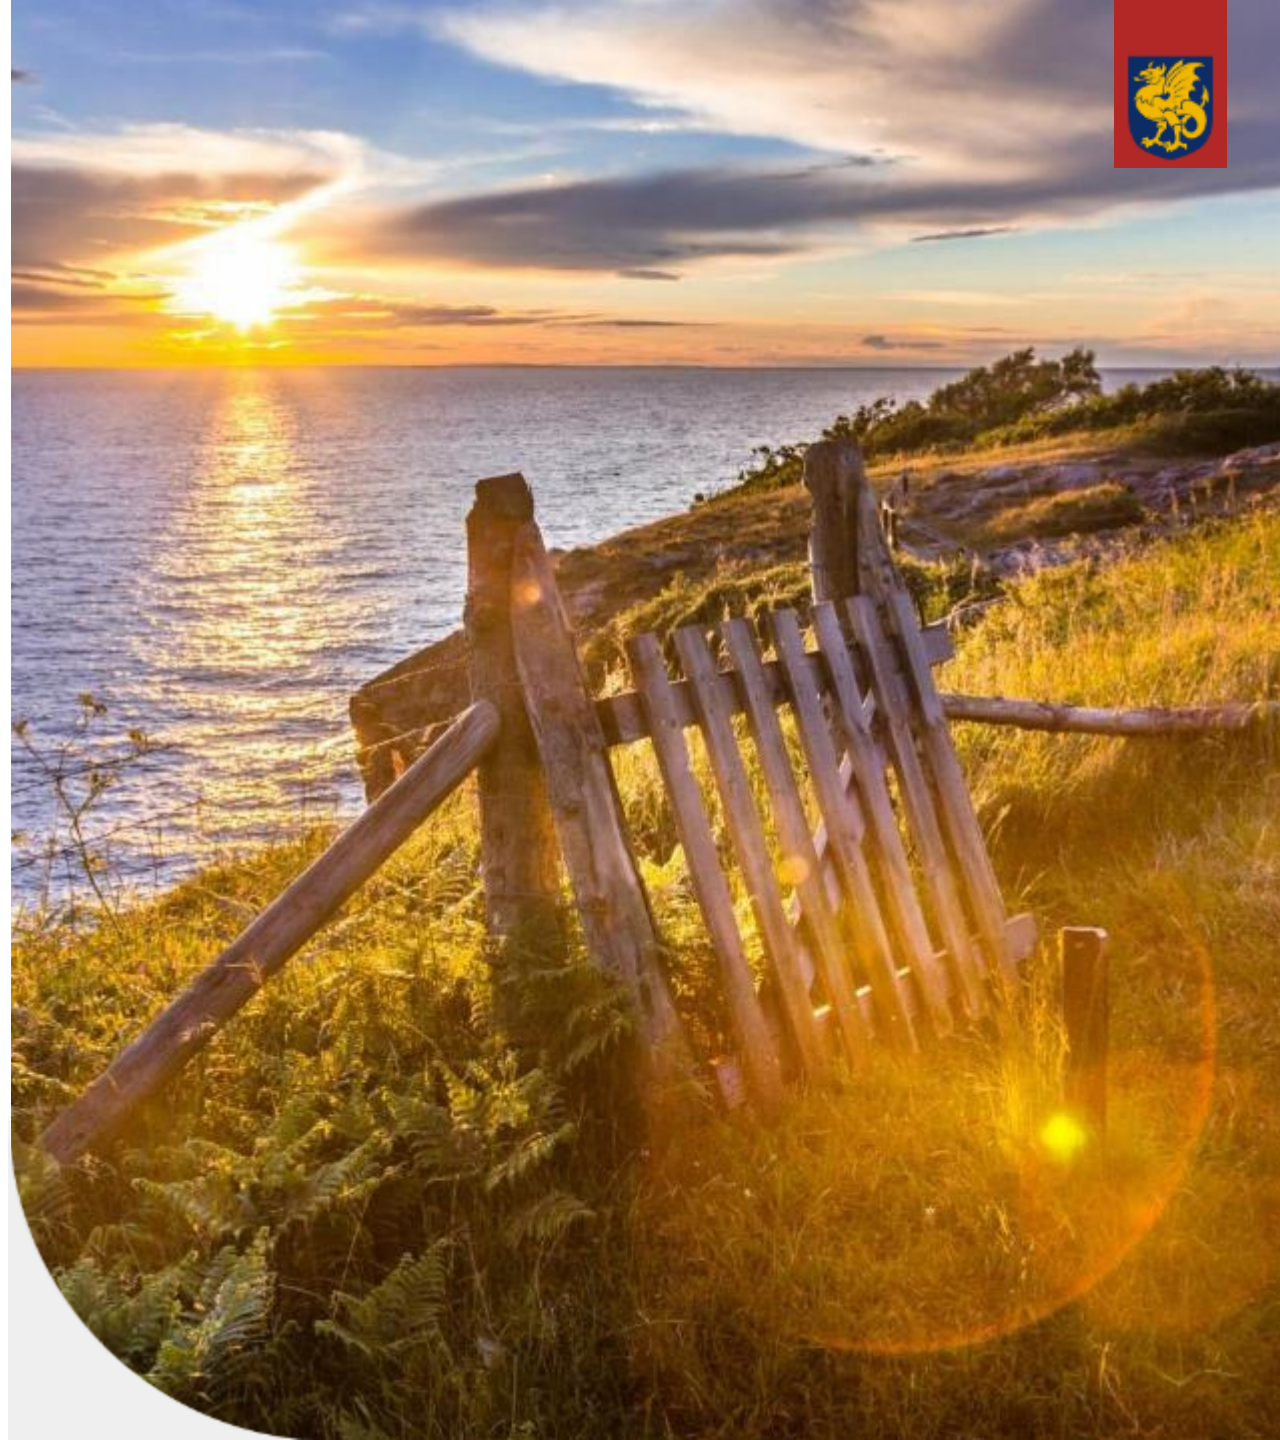

- Change in demographics
- Shortness in healthcare workers alongside with a decrease in healthcare students
- Decreasing budgets
- Difference in legislations internally and across sectors
- Documentation and GDPR across sectors
- Geographical challenges

Interventions

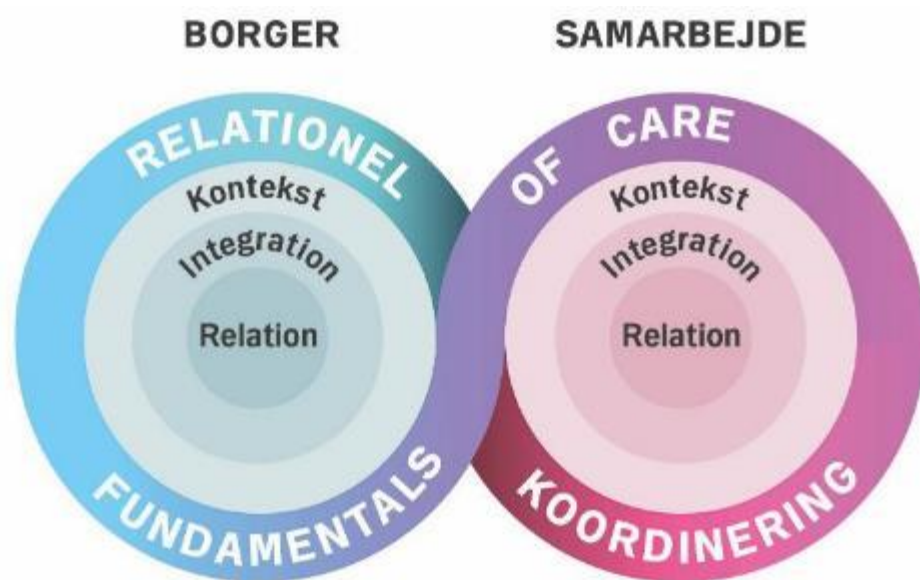

- Tele-outpatient functions (VOPD)
- Remote patient monitoring
- Remote simulation training
- E-consultation
- Collaborative cross sectoral subacute function
- Cross sectoral strategy for Nursing Care (iHAC)

Cross sectoral Strategy for Personcentered Nursing Care

Bornholms Hospital, Municipality of Bornholm, Psychiatric Hospital, Nursing School of Bornholm (GP)

- Fundamentals Of Care
- Relational Coordination

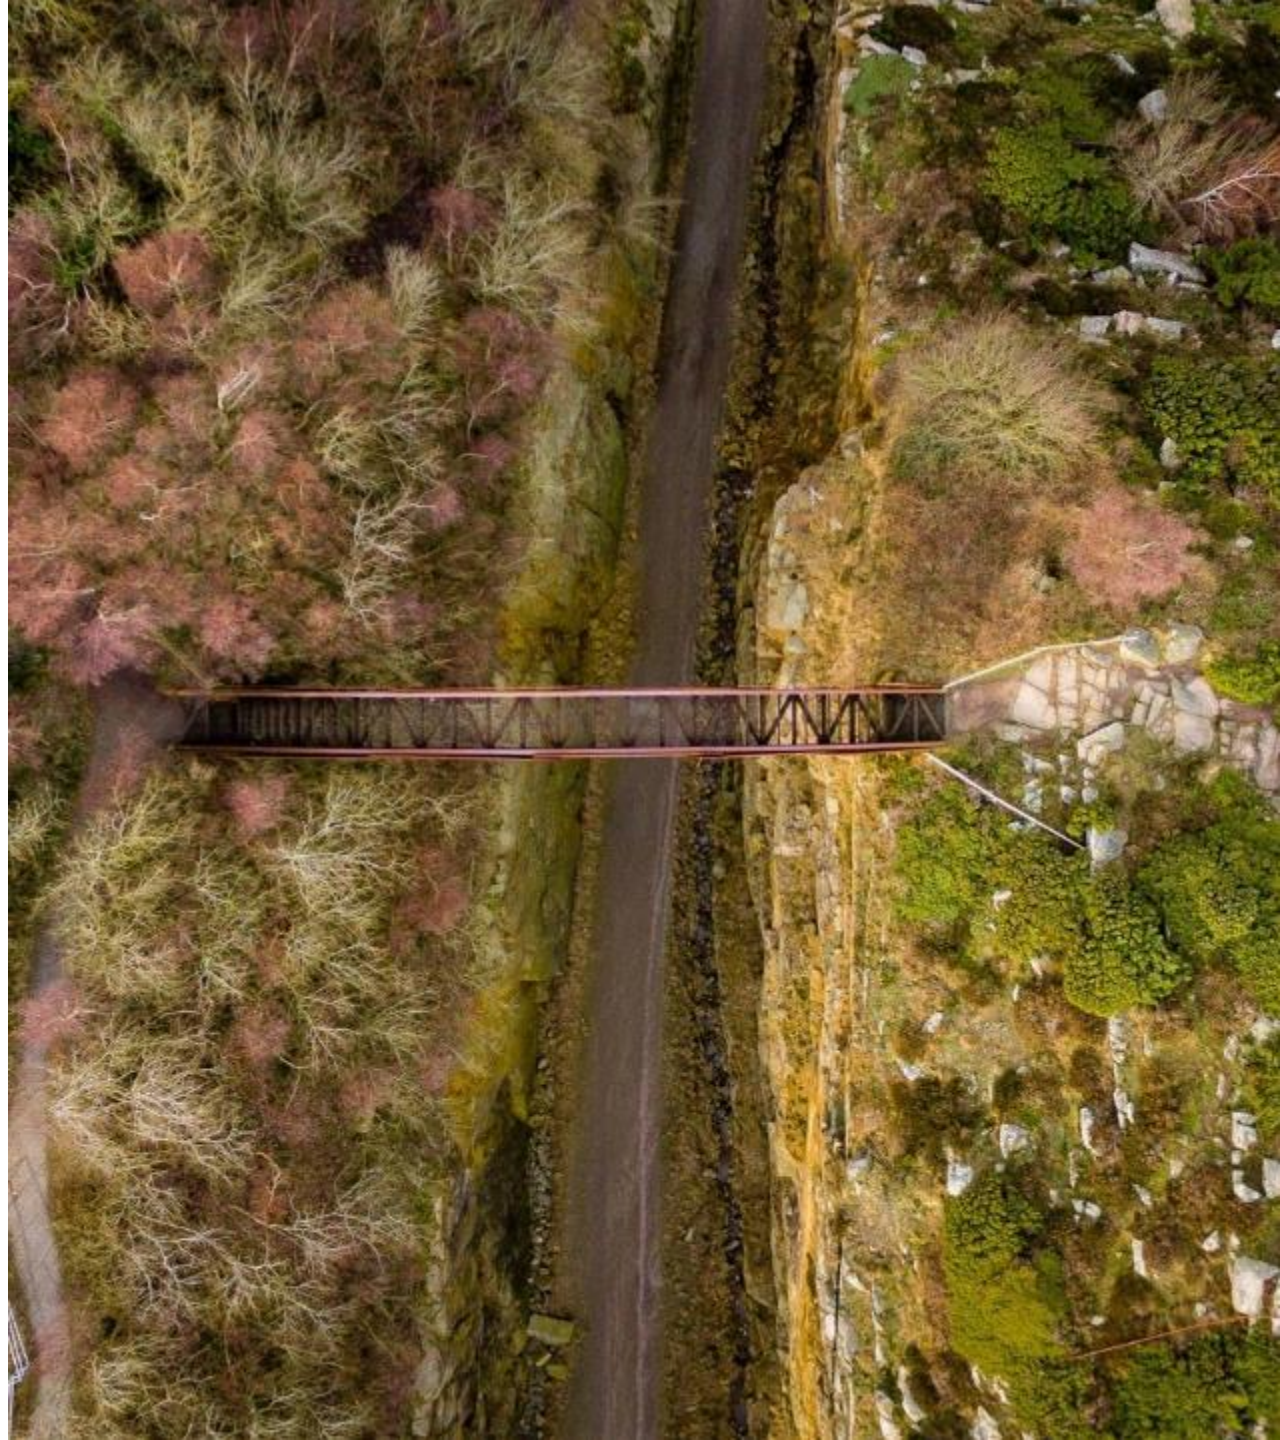

The FoC framework establishes a common language and ensures that nursing care is both professionally grounded and person-centered.

The collaborative model approach enhances coordination and strengthens relationships among healthcare professionals, which is essential to achieving our shared goal of placing the individual at the center of care.

Activities

- Designing the Strategy (iHAC proces)
- Describing the vision and the goals
- Cross sectoral Nursing Care Symposium
- Collaborative learning
- Undergraduate exposure

Learnings

- In small communities efforts to change and develop are likely to be dependant on individuals
- Rely on and exploit the momentum when it happens
- Small communities with similar operational functions as larger communities needs a proportionally larger workforce to maintain competencies and quality in healthcare

Where are we headed?

X-factors

Change of
Government

National
Healthcare
reform

Epidemiological
disasters

Other political
events

An aerial photograph of a rugged coastline. The deep blue ocean on the left meets a rocky shore on the right. White, frothy waves are crashing against the dark, layered rock formations. The rocks are a mix of dark grey and brown, showing signs of weathering and erosion. The sky is not visible, as the image is focused on the sea and the shore.
